

**Key features**

- Built-in anatomically correct curve for easy insertion
- Reinforced tip resists folding over during insertion and plugs the upper esophageal sphincter
- Cuff and airway tube molded as single unit for extra safety
- Extra soft cuff ensures the best possible seal with least possible internal pressure
- Autoclavable up to 40 times
- Color-coded pilot balloon identifies mask size and provides precise tactile indication of degree of inflation
- Ergonomically shaped for firm grip during insertion
- Convenient depth marks
- Latex free

**Ambu® Aura40**

Aura40 has a special curve that carefully replicates natural human anatomy. Molded directly into the tube, the unique shape makes correct insertion easy without abrading the upper airway.

Aura40's curve also ensures that the patient's head remains in a more natural position when the mask is in use without extra stress on the upper jaw. Moreover, Aura40 is specially designed to give the airway tube the flexibility needed to adapt to individual anatomical variances and a wide range of head positions.

Aura40 features our special reinforced tip, which helps prevent folds during insertion that can cause improper positioning and possible airway leak. In short, positioning is fast and accurate, each and every time.

**PRODUCT**

PRODUCT	MATERIAL
Tube/cuff	Silicone
Airway connector	Polysulphone
Pilot balloon/Manual vent	Silicone
Inflation valve adapter	Polyester
Inflation valve core	Polyester
Inflation valve body	Polypropylene (PP)
Inflation valve cap	Polypropylene (PP)
Inflation valve	Nitrile
Inflation valve	Stainless Steel

**PACKAGING**

PACKAGING	MATERIAL
Pouch	Tyvek/PA/Polyethylene (PE) Terephthalate (PET)/Polyethylene (PE)
Box	Cardboard
