About Ambu

Since 1937, breakthrough ideas have fuelled our work on bringing efficient healthcare solutions to life. We are dedicated to improve patient safety and determined to advance single-use devices. The manifestations of our efforts range from early inventions like the Ambu Bag™ resuscitator and the legendary BlueSensor™ electrodes to our newest landmark solutions like the Ambu aScope™ – the world's first single-use flexible endoscope. Our commitment to bringing new ideas and superior service to our customers has made Ambu one of the most recognized medtech companies in the world. Headquartered near Copenhagen in Denmark, Ambu employs approximately 2,500 people in Europe, North America and the Asia Pacific. For more information, please visit www.ambu.co.uk.

Ambu® aScope™ 4 Broncho

**Guaranteed sterility,
ready when you are.**

Single-use. The smarter solution for enhanced patient safety.

Guaranteed Sterility

Even with the most stringent cleaning procedures, reusable endoscopes are very difficult to clean and complete sterility cannot be assured.

Single-use aScope™ 4 Broncho guarantees sterility straight from the pack, avoiding the risk of cross-contamination while improving patient safety, enabling caregivers to focus on the best possible care for their patients.

Spend time on your patients rather than the equipment

This portable, intuitive bronchoscope is easy to set up, saving you valuable time and allowing you to concentrate on what really matters: your patients.

The single use bronchoscope requires zero handling or reprocessing after use, to help streamline your workflow, optimize resources and boost productivity.

Ready when you are

The aScope™ 4 Broncho is ready when you are, reducing the risks and frustrations associated with waiting for an available endoscope.

Your hassle-free bronchoscopy solution

Intelligent, innovative design

The aScope™ 4 Broncho is more than a simple bronchoscope. It is a fully integrated solution, helping you to deliver the very best in patient care.

The ergonomic, lightweight design to enhance the user experience, while the high bending angles and smooth and precise tip motion result in access to all lung segments.

Clear, crisp imagery

The aScope™ 4 Broncho connects to the Ambu® aView™, our portable, high resolution monitor that delivers clear visibility of the bronchial segments.

The sharp imagery and adaptive light control allows for easy navigation of the bronchial tree, resulting in a quick and confident assessment of the bronchial segments.

Three sizes for multiple procedures

The aScope™ 4 Broncho comes in three different sizes, enabling you to meet a wide range of bronchoscopy procedures.
